

----- 325readme.pdf

- Raul Cano, Joshua Wong, Thomas Becannon
- CS 325 - Fall 2024
- December 11th 2024

File descriptions:

325biz-rules.pdf - PDF file containing our platform's business rules.

325model.pdf - PDF file containing our platforms ER diagram and model.

325scenario.pdf - PDF file containing a written description of our platform, example questions, and initial business rules.

money.sql

325design-rs.txt

325populate.sql - SQL script containing the population of our tables that are created in 325design.sql.

325show-contents.sql - SQL script containing select * for all of our relations, when ran displays the full tables of our relations.

video.sql - SQL script we used for presentation video.

325design.sql - SQL script containing the table drop and creation of all of our relations, which will be populated with 325populate.sql

fac.sql - contained a demo faculty report for our presentation video.

325queries.sql - 24 SQL queries demonstrating the usefulness of our database

325reports.sql - 6 SQL reports for viewership

Instructions:

1. Enter 'sqlplus /' while in the directory.
2. enter: start 325design.sql
 - This will run the script containing table creation
3. proceed 2 with entering: start 325populate.sql
 - This will run the script containing table population
4. From here you can run 325show-contents.sql to view the complete tables of the entire database. If you want to change or add data, that can be done by entering vim 325populate.sql (not sql).
