TutorConnect Education Platform

Description:

- TutorConnect is an online platform that connects students with qualified tutors for one-on-one or group tutoring sessions. The platform manages schedules, payment processing, and progress tracking for students. Tutors can offer lessons in various subjects like math, science, languages, and test preparation. The platform also offers learning resources and practice tests

Example Questions:

1. What days does customer X have tutoring scheduled?
2. What days/times is tutor X available for tutoring?
3. Can students select their preferred tutors?
4. How will students feedback data be stored?
5. How do students see the availability of tutors?
6. Can we see what classes Tutor X can teach?
7. What type of tutoring sessions are available (i.e. group and independent)?
8. What type of student information needs to be provided by the student to participate in the tutoring service?
9. Can students see what type of lessons are available?
10. How do students get their payment and session history?

Initial business rules:

1. 1 Tutor and 1 student per individual session
2. Learning resources are publicly available
3. University students do not pay, services provided by University
4. Students and Tutors only contact outside of a session via in-app messaging system
5. Tutors cannot be Cal Poly Humboldt faculty
6. Students do not have to attend any sessions.
7. A tutoring session has to have at least one student
8. Tutors are required to teach at least one session
9. Max 1 tutor per 12 students in a group session
10. Faculty may only contribute via learning resources
11. Tutors can only access and make corrections to learning resources, not create them
12. You can only give feedback on an individual basis towards a tutor
13. University students do not have a payment dashboard
